

Magnet - Cylindrical - Nickel Plated

Part Number: M1219-5

Product Data Sheet

PICTURE	DIMENSIONS
	 Ø10 5 Drawings not to scale All dimensions in mm (inches) nominal.

✓ RoHS Compliant

SPECIFICATION	
Surface Gauss at surface	3500
Magnet Material	Neodymium Iron Boron
Operating Temperature	140°C Max.
Plating	Bright Nickel
Grade	N35H

Applications Include	Options
• Position and limit sensing. • Linear actuators. • Security system switch.	
Did you know we also sell?	
 Float Switches Reed Switches Movement Sensors Proximity Switches Acceleration / Shock Switches Reed Relays Solid State Relays	

Rev. No.	Revision Note	Date	Signature
1	Provisional	27-04-11	ML

As part of the company policy of continued product improvement, specifications may change without notice. Our sales office will be pleased to help you with the latest information on this product range and the details of our full design and manufacturing service. All products are supplied to our standard conditions of sale unless otherwise agreed in writing.
